OFFICIAL BIOGRAPHY

Music built as an environment.

Perfume of Static is an electronic duo from Brussels formed by Ben and Ema, working at the point where melodic ambient, downtempo and experimental electronics meet. Their music pairs warm harmonic movement and deep low-end with tactile, sometimes unfamiliar textures, creating pieces that feel intimate, cinematic and slightly displaced from the everyday.

Rather than treating atmosphere as background, Perfume of Static builds tracks as environments: melodies emerge, dissolve and return; bass carries physical weight; small details reward close listening. The project moves between stillness and motion, clarity and distortion, with an emphasis on emotional restraint over spectacle.
